

Tylersoft Technologies Integration

Revision History

Version	Author	Date	Description
1.0	Mompati Mokoka	2024-08-12	Initial draft
1.1	Mompati Mokoka	2025-04-14	Updated

Introduction

Tylersoft offers two options to integrate into the payment gateway: **Secure Acceptance** and **REST API**.

Workflow Overview

The Secure Acceptance integration involves two key steps:

1	Generate Web Token Request an authorization token to enable secure communication with the payment gateway.
2	Process Payment Submit payment details and redirect customers to the secure checkout page.

1. Authorization Request

Endpoint	https://Url:0000/ecommerce/web-token
Method	POST
Content-Type	application/json
Authorization	Basic

Parameters

Parameter	Description
password	Your API password provided by Tylersoft.

username

Your API username provided by Tylersoft.

Success Response

The server returns a web token that must be included in subsequent API calls:

JSON · Success Response

```
{
  "status": "00",
  "statusDescription": "Success",
  "token": "b0c95e2144bdd4c86b94501a814f9bbd9d025651d8497df"
}
```

Failure Response

JSON · Failure Response

```
{
  "status": "99",
  "statusDescription": "Invalid request",
  "token": ""
}
```

2. Payment Request

Endpoint	https://Url:0000/ecommerce/pay
Method	POST
Content-Type	application/json
Authorization	Bearer web_token

Service IDs

Service ID	Description
2034	Client ID

Request Parameters

Field	Description
amount	The transaction amount.

accountno	Customer's account number.
serviceid	Service identifier assigned by Tylersoft.
msisdn	Customer's mobile number.
currencycode	Currency code, e.g. BWP (Botswana Pula).
name	Customer's full name.
transactionid	Unique identifier for this transaction.

Sample Request

JSON · Sample Request

```
{
  "amount": "50",
  "accountno": "26777063984",
  "serviceid": "1000",
  "msisdn": "26777063984",
  "currencycode": "BWP",
  "name": "Mompoti Mokoka",
  "transactionid": "TRX_0008786707"
}
```

Success Response

JSON · Success Response

```
{
  "names": "Mompoti Mokoka",
  "Amount": "50",
  "decision": "ACCEPT",
  "accountno": "26777063984",
  "message": "Request was processed successfully.",
  "Phonenumber": "26777063984",
  "email": "mompoti@gmail.com",
  "responseCode": "100",
  "TransactionId": "5db6e116-74fb-44ec"
}
```

Failure Response Codes

Code	Description
99	Invalid request.
101	Unauthorized access.

Redirection Response

Once the payment request is processed, the customer is redirected to the secure checkout page to provide their card details and complete the payment. After completion, they are redirected to a predefined success or error page based on the transaction outcome.

HTML · Redirection Response

```
<form id="redirectForm" method="POST"
  action="https://secure.cybersource.com">
  <input type="hidden" name="transaction_id"
    value="TRX_0008786707">
  <input type="hidden" name="redirect_url"
    value="https://merchant.com/success">
</form>
<script type="text/javascript">
  document.getElementById("redirectForm").submit();
</script>
```

Front-end note: Render the server response containing the HTML form and JavaScript directly in the browser.

Illustration

Page 1 — Payment Details (after clicking Checkout)

The screenshot displays a payment interface. On the left, the 'Payment Details' section includes a 'Card Type' dropdown with options for Visa (selected), Mastercard, and Amex. Below this are input fields for 'Card Number' and 'Expiration Date'. At the bottom of this section are 'Cancel' and 'Next' buttons. On the right, the 'Your Order' section shows a 'Total amount' of 'P10.00' and a link to 'Change payment method'.
